CONCLUSION

Now a day's majority of the farmers are given topmost priority in horticulture cultivation for additional income. Horticulture-today is popular form of agriculture in Chechari regions of Mahuadanr block. It is an important source of food supply. Horticulture improves plant production, commercialization to improve plants breeding and quality of life for humans and animals. In this field visits we learnt horticulture cultivation process, plantation process, caring harvesting and marketing of different crops, which promote self-employment and livelihood opportunities. The growth and development of horticulture has an impact on socio-economic life of the people in different villages of Chechari region. Last but not the least we observed that horticulture play a import role in generating local economy in Chechari regions of Mahuadanr block of Latehar district.
